## Description

### 2021 Snap Dock Floating Dock Systems/JetSki Lifts/More

#### Why Snap Dock?

#### Versatility:

Snap Dock's Floating dock system is versatile and can be used for residential, commercial, and industrial applications including marinas, restaurants, campgrounds, resorts, and boat rental facilities.

#### Built to Last:

Snap Dock Floats are rotationally molded from linear low density polyethylene and are backed by an 8-year limited warranty. Given the fact the Snap Dock's first customers were industrial operators, you can rest assured that our products were built to withstand the harshest conditions.

#### Low Maintenance:

Snap Dock Products require less maintenance than a traditional wood dock system. Due to the unique paver pattern surface that will channel water and light gray color that hides dirt, they will maintain their high-end appearance for longer before needing to be cleaned.

#### Easy to Configure:

Compared to traditional systems and even other plastic floating dock products, Snap Dock's connection system makes installation a quick and straightforward process and can even be done on the water using our installation tool.
